University Funding 2016-2018

University Funding 2019-2021

University Steering and Governance

institutional and systemic measures

- **planning** and controlling of **basic funding indicators** (universities and ministry)
- agreement on **compulsory performance indicators** (universities and ministry)
- implementation of **cost accounting** (universities)
- national **University Development Plan 2016-2021** (ministry)

Conclusion

- **performance-based funding** taking into account **cost structures**
- **focus of performance agreements** has changed (not only recently):
 - from agreeing details on projects
 - to a wider perspective of main indicators
- deepening of implementation of the new funding model depending on future university budgets
