

THINK GLOBALLY AND ACT JOINTLY

Clever usage of EU programs for the development and implementation of structures supporting doctoral education. Which structures and measures are necessary to support this approach.

Angelina Taneva-Veshoska

- Institute for Research in Environment Civil Engineering and Energy, Skopje, Macedonia

Christiane Wüllner

- RUB Research School, Ruhr-Universität Bochum, Germany
- Common research projects in the area of civil engineering combined with doctoral education

- We would like to encourage people in charge to make use of European funding possibilities for structural networking related to doctoral education.
- Which support is needed to bridge the gap between

Discussion about doctoral education on European level through EUA-CDE

Development and implementation of standards for doctoral education with European funding programs.

- Why did we chose this topic?

- Useful and inspiring discussion during EUA-CDE meetings and workshops

- Realization at home universities is not always possible and a crucial step. Its not always a matter of funding but of responsibility

OUR PRACTICAL EXPERIENCE

- Improving conditions for doctoral education at Macedonian university in Skopje
- European network approach by using European funding
- Identification of the right funding program
- Involvement of cooperation partners
- Suggestion of the right measures
- ERASMUS+ proposal

Do we need a supporting structure which:

- makes visible existing international projects and instruments supporting doctoral education
- explains the EU Horizon2020 and Erasmus+ programs with respect to an application for structural development to support doctoral education
- establishes a link between EU research support and EUA-CDE activities for a better understanding of the EU programs
- initiates a network of mentors who are willing to share their experiences and who accompany EU programs to realize common goals in doctoral education
- initiates a discussion if new instruments will be needed to push the European doctoral education forward?

These are only some of our ideas and we are sure that there are much more ideas in your heads 😊.
