

# Inter-institutional Collaboration in Doctoral Education

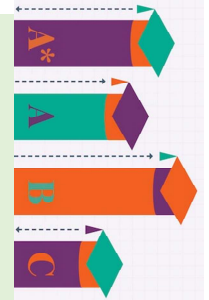

## It is about:

- Co-creating
- Making synergies
- Improving
- Sensemaking

## At what levels:

- **Internally:** with faculties, research centers, labs, other units
- **Externally:** with other scientific institutions from your own country; with institutions from abroad; with public institutions; with business organisations

## About what (e.g.):

- Joint doctoral programs
- Joint degrees
- Dual degrees
- Co-tutelle
- Applied & industrial doctorates
- Marie Skłodowska-Curie Innovative Training Networks
- Winter/Summer Schools

## Why do we need it?

- To open up doctoral education to the world
- To combat insularity
- To make life-long learning of the institution
