

Sharing an interdisciplinary experience

Lucimar Dantas, Carla Galego, Maristela Simão, Nagayamma Aragão

What is the CSDC?

The Citizen Science Doctoral College is a forum for discussion and training that brings together doctoral candidates in Education, Urbanism and Museology, thesis advisors and researchers in the research centre CeiED, at Lusófona University, Lisbon, Portugal, around joint and interdisciplinary activities of support to Thesis research works.

It is a space for the co-creation of scientific knowledge, based on the principles of **social and cognitive justice**, which can directly contribute to the development of research conducted by its members and, indirectly, to the consolidation of a collaborative, inter/transdisciplinary, attentive to the contemporary challenges of society and the place of science in this context.

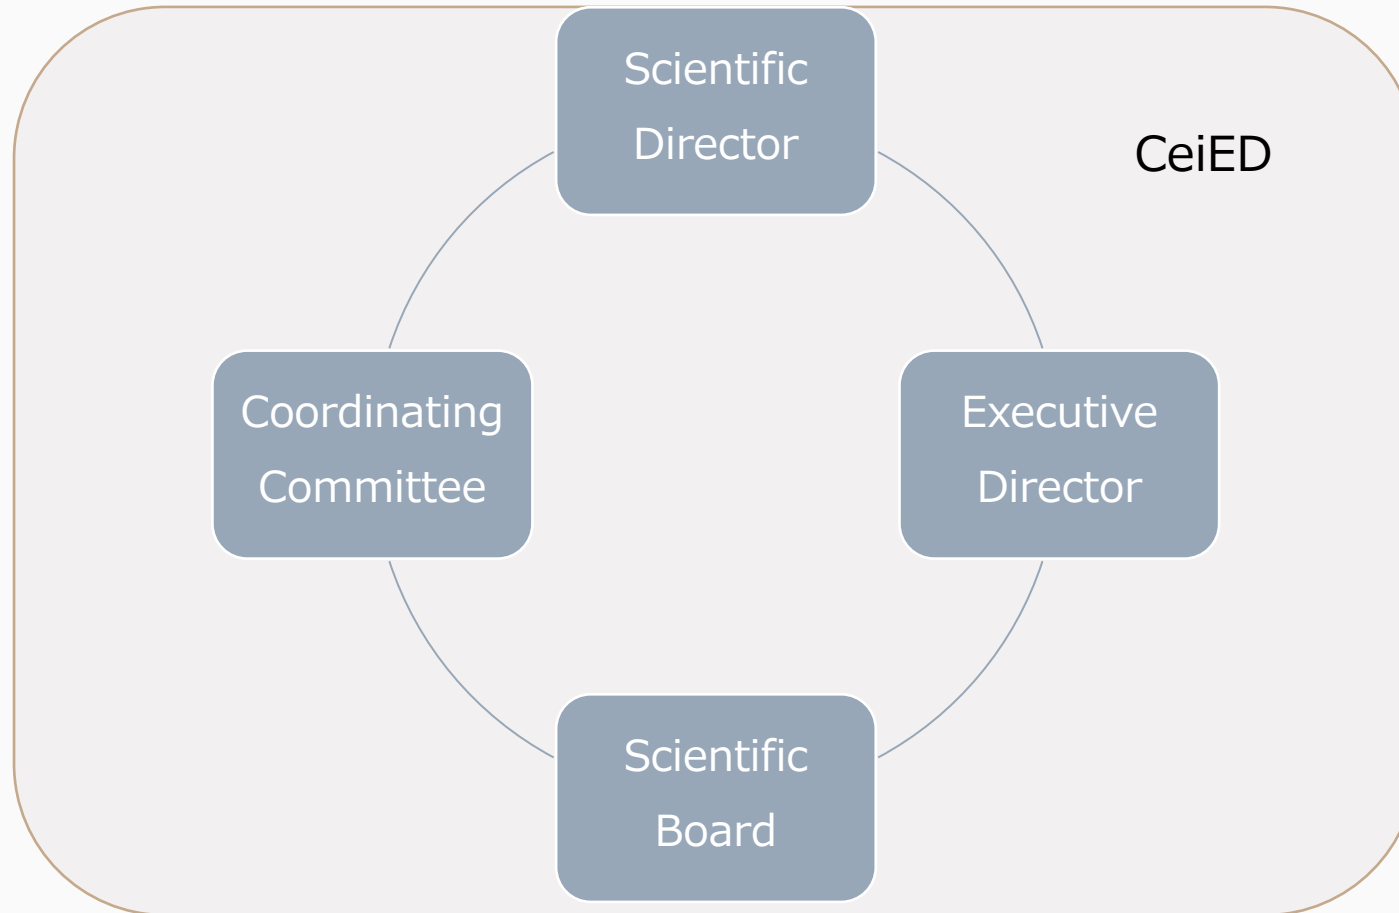

**Realization and
defense of a public
science that
combines research
with intervention in
social, economic,
educational and
cultural reality**

Citizen Science

MAIN GOALS

- To stimulate interdisciplinary work between the 3 PhDs programs in defense of a citizen science.
- To consolidate the interdisciplinary dialogue and the transposition of the barriers of disciplinary thinking.
- To encourage a culture of scientific debate, sharing and intellectual curiosity.
- To create conditions to raise the scientific quality of the Thesis.
- To offer training means to increase the completion rate of PhDs

Main targets

Doctoral candidates

- Complementary training
- Access to grant opportunities
- Space to scientific debate on their thesis

Researchers

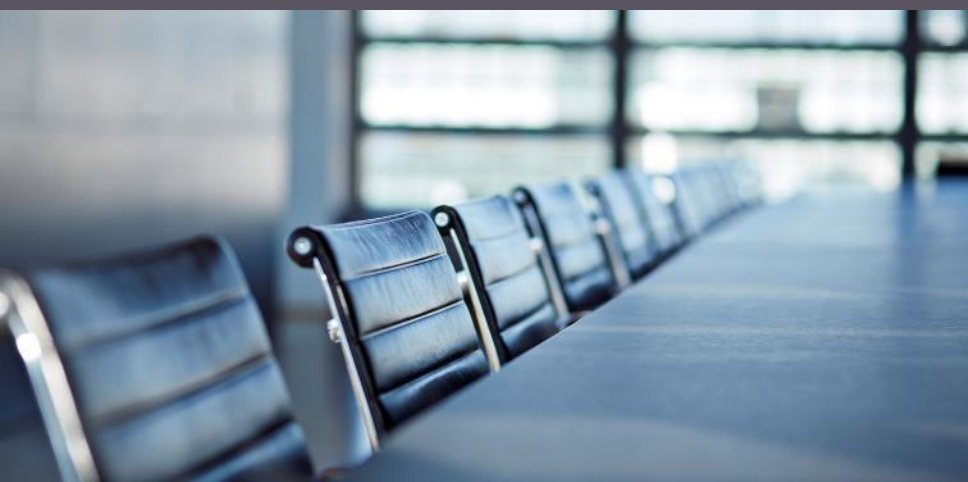

- Thesis supervision discussion
- Scientific debate – ongoing HE themes

Internacionalization

- Dialogue with EU partners - EUA
- Students and teachers' mobility
- Partnerships and joint research opportunities

WORKSHOPS	WEBINAR / CONFERENCES
Ethical issues in research	European strategy for universities 2030
Scientific curriculum management systems: ORCID and Ciência Vitae	International mobility for students
Standards for the preparation of Thesis, Dissertations and papers	International mobility for researchers, teachers and staff
Applications for projects, grants and other funding	12º CeiED Annual Meeting
Handling quantitative data - Excell	
Writing articles, reviews and other academic works	
Interdisciplinarity, culture and social intervention - a case study in the museum	

Activities 2021-2022

1st year critical analysis

- Joint work between the 3 PhD programs
- Number of members - 178
- Internationalization
- Time
- Amount of activities
- In presence activities

The EMU Citizen Science Doctoral College – CeiED

Presentation

The EMU Citizen Science Doctoral College – CeiED is a forum for discussion and training that brings together students of the Doctoral Degrees in Education, Urbanism and Museology, advisors and researchers, around joint and interdisciplinary activities of support to Thesis research works. It is a space of co-creation of scientific knowledge, based on the principles of social and cognitive justice, which may contribute directly to the development of the investigations conducted by its members and, indirectly, to the consolidation of a collaborative, inter/transdisciplinary scientific culture, attentive to the contemporary challenges of society and to the place of science in this context. Its designation – Citizen Science – reflects one of the links between the three Doctorates of CeiED: Education, Urbanism and Museology, which, with their specific goals and programs, have in common the achievement and defense of a public science that articulates research with the intervention in the social, economic, educational and
